

ANTILLA PORPHYRY PROJECT
Property Geology and Drill Holes

ZONE OF SECONDARY SULPHIDE ENRICHMENT

East Block Geological Potential (7 drill holes): *Global estimate by SRK Consulting:*

- **± 135 MT @ 90% confidence 0.63% - 0.79% copper “untrimmed”**
OR
- **± 135MT @ 90% confidence 0.61% - 0.75% copper “trimmed”**
(“trimmed”: all 2m assay intervals over 1.5% reduced to 1.5%)

Other Targets: West Block (near surface) Potential Copper – Porphyry (at depth)

ANTILLA PORPHYRY PROJECT

Geological Cross Section A-B'
