MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The consolidated financial statements of Panoro Minerals Ltd. are the responsibility of the Company's management. The consolidated financial statements are prepared in accordance with Canadian generally accepted accounting principles and reflect management's best estimates and judgments based on information currently available.

Management has developed and maintains a system of internal controls to ensure that the Company's assets are safeguarded, transactions are authorized and properly recorded and financial information is reliable.

The Board of Directors is responsible for ensuring management fulfills its responsibilities for financial reporting and internal controls through its Audit Committee, which is comprised primarily of non-management directors. The Audit Committee reviews the results of the audit and the annual consolidated financial statements prior to their submission to the Board of Directors for approval.

Supplemental cash flow information

Cash paid for interest and income taxes was \$nil in 2010 (2009 - \$nil).

Amortization of \$5,268 (2009 - \$8,987) was capitalized to the Antilla property.

Accounts payable includes \$5,000 relating to a deposit received from Strait Gold on the option of the Company's Alicia property.

An accrual for mineral concession fees of \$418,057 (2009 - \$392,444) was included in accrued liabilities and mineral interests at period-end.

Cash and cash equivalents includes term deposits of \$nil (2009 - \$1,450,036)

PANORO MINERALS LTD.

An Exploration Stage Company

Notes to the Consolidated Financial Statements

For the Periods Ended March 31, 2010 and 2009

Unaudited – Prepared by management

(in Canadian dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

The Company is an exploration stage company engaged principally in the acquisition, exploration and development of mineral properties.

The Company's investment in its mineral interests comprises a significant portion of the Company's assets. Recovery of the carrying value of the investment in these assets is dependent upon the existence of economically recoverable reserves, establishing legal ownership of the resource properties, the ability of the Company to obtain necessary financing to complete the exploration and development, and the attainment of future profitable production or the disposition of these assets for proceeds in excess of their carrying values.

At March 31, 2010 the Company has \$248,967 in cash and accounts payable of \$549,092 of which \$417,670 is payable in June 2010 in order to keep mineral properties in good standing. On April 8, 2010 the Company entered into an agreement on the Antilla project that should provide \$8 million over the next 23 months (note 11). These funds will be sufficient to meet obligations, planned exploration, and general and administrative costs. However, if not all of the funds are received then the Company will need to raise additional funds in order to meet their obligations.

2. BASIS OF PRESENTATION

The accompanying unaudited interim consolidated financial statements of the Company have been prepared in accordance with Canadian generally accepted accounting principles for interim financial statements and accordingly do not include all disclosures required for annual financial statements.

These unaudited interim financial statements follow the same significant accounting policies and methods of application as the Company's consolidated financial statements for the year ended December 31, 2009 ("Annual Financial Statements"). These interim financial statements should be read in conjunction with the Annual Financial Statements.

Certain of the period's figures have been reclassified to conform to the current period's presentation.

3. NEW ACCOUNTING STANDARDS

(a) Goodwill and Intangible Assets

Effective January 1, 2009, the Company adopted the new Canadian Institute of Chartered Accountants (CICA) guidelines of Section 3064, *Goodwill and Intangible Assets*, which establishes standards for the recognition, measurement, presentation and disclosure of goodwill and intangible assets. Adoption of this standard had no effect on the consolidated financial statements.

(b) Financial instrument disclosure;

Handbook Section 3862, Financial Instruments – Disclosures establishes revised standards for the disclosure of financial instruments. The new standard establishes a three-tier hierarchy as a framework for disclosing fair value of financial instruments based on inputs used to value the Company's investments. The hierarchy of inputs and description of inputs is described as follows:

- Level 1 – fair values are based on quoted prices (unadjusted in active markets for identical assets or liabilities);
- Level 2 – fair values are based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); or
- Level 3 – fair values are based on inputs for the asset or liability that are not based on observable market data, which are unobservable inputs.

PANORO MINERALS LTD.

An Exploration Stage Company

Notes to the Consolidated Financial Statements

For the Periods Ended March 31, 2010 and 2009

Unaudited – Prepared by management

(in Canadian dollars)

3. NEW ACCOUNTING STANDARDS (Continued)

Changes in valuation methods may result in transfers into or out of an investment's assigned level. This additional disclosure has been provided in note 4.

(c) International Financial Reporting Standards ("IFRS")

In February 2008, the Canadian Accounting Standards Board confirmed that publicly accountable enterprises will be required to adopt International Financial Reporting Standards ("IFRS") for fiscal years beginning on or after January 1, 2011, with earlier adoption permitted. Accordingly, the Company will transition from current Canadian GAAP reporting and commence reporting under IFRS no later than in the first quarter of 2011, with restatement of comparative information presented. The Company has identified mineral property, and future income tax liability, as areas where the adoption of IFRS may have a material effect on the Company's financial reporting. In addition, the Company is currently assessing the elections available under IFRS to determine the effect of each election to the Company. The Company expects to quantify the effects of the application of IFRS on the January 1, 2010 balance sheet during the first half of 2010.

4. FINANCIAL INSTRUMENTS AND CAPITAL MANAGEMENT

Fair value of financial instruments

The carrying values of cash and cash equivalents, accounts, and advances receivable, and accounts payable, and accrued liabilities approximate their fair values due to the relatively short periods to maturity of these instruments.

At March 31, 2010, the Company held marketable securities with a cost of \$301,801 (December 31, 2009- \$393,975) and a fair value of \$120,090 (December 31, 2009 - \$72,300). The difference between fair value and cost of \$181,711 at December 31, 2009 has been included in the statement of accumulated other comprehensive loss.

Cash and cash equivalents and marketable securities are reflected on the balance sheet at fair value and both items are ranked using a level 1 hierarchy as described in note 3 (b).

Credit Risk

The Company manages its credit risk through its counterparty ratings and credit limits. The Company is mainly exposed to credit risk on its bank accounts. Bank accounts are primarily with Canadian Schedule 1 banks and Banco de Credito in Peru. The Company has minimal accounts and advances receivable in 2009 and the 2008 amount primarily relates to VAT receivable from the Peruvian government with payment received from the Peruvian government in 2009. The total cash and cash equivalents and account and advances receivable represent the maximum credit exposure.

Liquidity Risk

The Company manages its liquidity risk by ensuring that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash. The Company's cash is primarily invested in business bank accounts and bankers acceptances which are available on demand. The Company's cash is not invested in any asset backed commercial paper. Contractual commitments that the Company is obligated to pay in future years are disclosed in note 10 and accounts payable and accrued liabilities require payment within one year.

Market Risk

The significant market risk exposures to which the Company is exposed are foreign currency risk, interest rate risk and equity price risk.

PANORO MINERALS LTD.

An Exploration Stage Company

Notes to the Consolidated Financial Statements

For the Periods Ended March 31, 2010 and 2009

Unaudited – Prepared by management

(in Canadian dollars)

4. FINANCIAL INSTRUMENTS AND CAPITAL MANAGEMENT (Continued)

Foreign currency risk

The Company maintains its accounts in Canadian dollars. The Company is exposed to foreign currency fluctuations to the extent mineral interests, exploration expenditures, and operating expenses incurred by the Company are not denominated in Canadian dollars. The Company does not use derivatives or other methods to manage the foreign currency risk. The Company's operations in Peru make it subject to foreign currency fluctuations and such fluctuations may materially affect the Company's financial position and results. The Company's operating results and cash flows are affected to varying degrees by changes in the Canadian Dollar exchange rate vis-a-vis the Peruvian Nuevo Sol, and the US Dollar. The Company purchases foreign currencies as the need arises in order to fund its exploration activities. Corporate expenditures are mainly incurred in Canadian and US dollars.

Interest rate risk

The Company's bank accounts earn interest income at variable rates. The fair value of its portfolio is relatively unaffected by changes in short-term interest rates. The Company's future interest income is exposed to changes in short-term rates.

The Company's objective when managing capital is to safeguard the Company's ability to continue as going concern such that it can continue to provide returns for shareholders and benefits for other stakeholders. The Company considers the items included in shareholders' equity as capital. The Company manages the capital structure and makes adjustment to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust its capital structure, the Company may issue new shares, sell assets to settle liabilities or return capital to its shareholders. The Company is not subject to externally imposed capital requirements.

5. MINERAL INTERESTS

The investment in and expenditures on mineral interests comprise a significant portion of the Company's assets. Realization of the Company's investment in these assets is dependent upon the establishment of legal ownership, the attainment of successful production from the properties or from the proceeds of their disposal.

Although the Company has taken steps to verify the title to mineral properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

Panoro Apurimac S.A., Peru

On June 7, 2007, the Company completed the acquisition of 100% of the issued and outstanding shares of Panoro Apurimac (formerly Cordillera de las Minas S.A.), a Peruvian corporation, from CVRD International S.A. and El Tesoro CDLM owns a 100% interest in 13 properties located in the Andahuaylas – Yauri Belt of Peru south of Cuzco.

Antilla and Cotabambas are two of the CDLM properties that are in an advanced exploration stage. The remaining 11 properties are Kusiorcco, Cochasyhuas, Checca, Alicia, Promesa, Pistoro Norte, Sancapampa, Humamantata, Pataypampa, Anyo, and Morosayhuas and are all in various stages of exploration.

The Company has focused on advancing Antilla, Cotabambas and Kusiorcco and will further the other properties as the resources become available.

PANORO MINERALS LTD.

An Exploration Stage Company

Notes to the Consolidated Financial Statements

For the Periods Ended March 31, 2010 and 2009

Unaudited – Prepared by management

(in Canadian dollars)

5. MINERAL INTERESTS (Continued)

Antilla Property, Peru

The Antilla project (7,400 hectares) is in an advanced exploration stage. A NI 43-101 compliant resource estimate was published on August 4, 2009. See note 11 subsequent events for information on the joint venture on the Antilla property on April 8, 2010.

Cotabambas Property, Peru

Cotabambas (9,900 hectares) is an advanced exploration project on a cluster of copper gold porphyry systems. Work in 2009 focused on advancing the community relations dialogue and completion of the Semi-detailed Environmental Impact Assessment (EIASd) required by the Ministry of Energy and Mines (MEM) for the exploration permit

El Rosal Property, Peru

The Company has a 100% interest in 12 mineral concessions totaling 8,200 hectares located in the Province of Chiclayo, Department of Lambayeque, Peru. The 2008 exploration program at El Rosal commenced on January 26, 2008 and was completed on April 30, 2008.

Alicia Property, Peru

On September 25, 2009 the Company entered into an agreement with Strait Gold Corporation whereby Strait Gold may earn up to 100% in the Company's early stage Alicia copper-gold property in Southern Peru, subject to a 2% net smelter return royalty.

In order to earn 55% of the Alicia project, Strait Gold will have to perform the following

- Issue 100,000 shares of Strait Gold to Panoro on signing; – completed
- Obtain an authorization-to-explore agreement with the local community before March 25, 2011;
- Spend at least US \$150,000 on the Alicia property within the first year after obtaining an agreement;
- Issue 200,000 common shares of Strait Gold one year after obtaining the community agreement;
- Spend at least US \$500,000 within the second year after obtaining the community agreement; and
- Issue 300,000 common shares of Strait Gold two years after obtaining the community agreement.

In order to earn the remaining 45% of the Alicia project, Strait gold will need to spend an additional US \$600,000 in the third year after obtaining the community agreement and issue an additional 400,000 Strait Gold common shares. The net smelter royalty can be reduced from 2% to 1% for a payment of US \$2.3 million which is payable by Strait Gold within six months of obtaining 100% ownership.

Surigao Project, Philippines

The Company formerly had an interest in the Surigao project belonging to Mindoro Resources Ltd. ("Mindoro"). As part of the sale agreement, in the event that the nickel laterite prospect, located on the Agata project should proceed to production and upon shipment of an aggregate one million wet tonnes of nickel laterite, Mindoro will pay the Company an additional \$500,000 cash, plus an additional \$500,000 cash on the first anniversary of the shipment. The likelihood of the nickel laterite prospect coming into production is unknown at this time. Accordingly, any proceeds to be received by the Company will be included in operations when received.

The Company closed a non-brokered private placement on December 30, 2009. The net proceeds from the private placement were \$553,793 on issuance of 3,114,000 units at \$0.20 per unit. Each unit is comprised of one common share and one share purchase warrant. Each warrant is exercisable for \$0.30 for 18 months. A cash commission equal to 8% was paid to the agents in addition to 249,120 agents warrants to purchase units under the same terms as the financing. The value of the agents warrants issued on the private placement was \$60,296 based on the fair value of proceeds received using the Black Scholes model with the following assumptions; risk free rate of 2.9%, expected dividend yield of 0%, volatility of 148% and an expected life of 1.5 years. All of the warrants expiring June 30, 2011 carry a forced conversion feature whereby if the stock price trades over \$0.45 for ten consecutive days, the Company can give notice to warrant holders that the warrants must be exercised within 30 days.

7. CAPITAL STOCK (Continued)

(a) Stock Options Outstanding

Stock options to purchase common shares have been granted to directors and employees at exercise prices determined by reference to the market value on the date of the grant. The number of shares available for options to be granted under the Company's stock option plan is 12,000,000 as approved at the 2008 Annual General Meeting. Options granted under the plan vest immediately or over a period of time at the discretion of the board of directors.

A summary of the status of the Company's stock options as at March 31, 2010 and changes during the quarter is as follows:

	Number of Options	Weighted Average Exercise Price
Outstanding at December 31, 2009	5,950,000	\$ 0.37
Granted	250,000	0.20
Expired	(800,000)	0.25
Outstanding at March 31, 2010	5,400,000	0.38

The following summarizes information about stock options outstanding and exercisable at March 31, 2010:

Options Outstanding at March 31, 2010			Options Exercisable
Year of Expiry	Number of Options	Weighted Average Exercise Price	Number of Shares
2010	875,000	\$0.25	875,000
2011	825,000	0.33	825,000
2012	1,800,000	0.62	1,612,500
2013	850,000	0.46	850,000
2014	1,050,000	0.16	1,050,000
	5,400,000	\$0.38	5,275,000

The weighted average life of exercisable options outstanding is 2.2 years as of March 31, 2010.

7. CAPITAL STOCK (Continued)

(b) Stock-Based Compensation

During the quarter ended March 31, 2010, the Company granted 250,000 stock options (2009 – 100,000) to consultants of the Company with a weighted average exercise price of \$0.20 (2009 - \$0.20) per share, which can be exercised for a period of up to two years. The options vest quarterly over one year.

Stock-based compensation expense was \$8,324 in the period ended March 31, 2010 (2009 - \$131,861), of which \$nil (2009 - \$nil) was capitalized to mineral properties.

The fair value of stock options used to calculate compensation expense is estimated using the Black-Scholes option pricing model with the following assumptions:

	2010	2009
Risk-free interest rate	1.68%	1.75 – 1.79%
Expected dividend yield	0.0%	0.0%
Expected stock price volatility	135%	109 - 112%
Expected option life in years	2	4.2

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate.

(c) Share Purchase Warrants

At March 31, 2010, the Company had outstanding warrants to purchase an aggregate 3,363,120 common shares as follows:

Expiry date	Exercise Price	Outstanding at December 31, 2009	Issued	Exercised	Expired	Outstanding at March 31, 2010
30-Jun-11 Warrants	0.30	3,114,000	-	-	-	3,114,000
30-Jun-11 Agents Warrants ⁽²⁾	0.20	249,120	-	-	-	249,120
Total		3,363,120	-	-	-	3,363,120

⁽¹⁾ Each \$0.20 agents warrant can be exercised for one common share and one new share purchase warrant, each share purchase warrant can be exercised for \$0.30 in return for one common share.

All of the warrants expiring June 30, 2011 carry a forced conversion feature where by if the stock price trades over \$0.45 for ten consecutive days, the Company can give notice to warrant holders that the warrants must be exercised within 30 days.

11. SUBSEQUENT EVENTS

Antilla project

On April 8, 2010, the Company entered into a joint venture agreement with Chancadora Centauro SAC (Centauro) for the development of the Antilla Copper Molybdenum project in Peru. Under the terms of the agreement, Centauro committed to making cash payments of \$US 8 million and spending \$US 17 million over a 30 month period. Payments are scheduled as follows.

- \$US 1 million on signing, pursuant to the terms outlined below (received)
- \$US 4 million 90 days after signing a community agreement with Antilla - July 17, 2010
- \$US 3 million by March 17, 2012
- \$US 17 million will be invested towards the completion of bankable feasibility studies on the project and will include Panoro's share of such costs

Centauro receives the following,

- A right to match any offer by a third party on Panoro's 100% owned Cotabambas project and a \$US 1,000,000 credit towards any such offer accepted by Centauro, provided they maintain an interest in Antilla.
- Equipment at the Antilla project including trucks, tents and a generator with a net book value of \$62,320

Initially 100% of the Antilla property will be transferred to Centauro and Panoro will retain a 2% Net Smelter Royalty, however, under the terms of the agreement, Panoro has the sole option to convert the NSR into a 30% ownership of the Antilla project. In the event that Centauro sells the Antilla project before Panoro has exercised their option, the NSR increases to 6% and Panoro receives an additional \$US 1 million. Management intends to convert the NSR to a 30% holding once the \$US 17 million investment and feasibility studies are complete.

In the event that Centauro chooses not to continue with the investment, the property will be returned to Panoro.

Options

On April 11, 2010 the Company granted 3,150,000 stock purchase options to directors, officers, and management. The option grants have an exercise price of \$0.30, vest immediately, and expire on April 12, 2010.

Community Agreement

On April 20, 2010 the Company signed a two year agreement with the indigenous community at the Antilla Copper/Molybdenum Project in Peru. The signing of the agreement permits the Company and its joint venture partner, Chancadora Centauro to begin exploration work immediately.
